

**SECRET**NPIC/TDS-178/67  
3 October 1967

MEMORANDUM FOR: Director, National Photographic Interpretation Center

SUBJECT: Request to Expend FY-65 Funds for an Overrun  
Amounting to [ ] with [ ]

25X1A

1. In FY-65, NPIC contracted with [ ] for the design and development of a modified Film Transport System for the [ ] Enlarger. This development was technically successful satisfying operational requirements. However, upon final settlement the contractor, claimed an overrun amounting to [ ]. This is the second overrun claimed by [ ]. On 20 May 1966, the original contract was amended to include an additional amount of [ ] to allow for underestimated costs on the part of the contractor. This overrun was approved by NPIC in order to preserve the sound and valuable project.

25X1A

2. The Technical Development Staff is not in sympathy with the payment for this current after-the-fact overrun; however, it is not worth contesting. TDS discussions with the contracting officer/Office of Logistics (O/L) indicate that the contractor's reply is sufficient to justify an overrun. This opinion on the part of O/L provides the validity of the payment even though TDS believes that [ ] was deficient in their accounting procedures.

25X1A

3. The Assistant for Technical Development recommends that this overrun be paid as a matter of expediency and as a matter of form in order to terminate the contract. Budget and Finance Branch has affirmed that sufficient funds are available for this expenditure.

[ ]  
Colonel, USAF

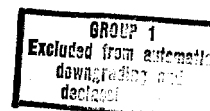

Assistant for Technical Development, NPIC

63-65R, Task Order No. 4

Reference

CW66-2051, dated 11 March 1966

Gentlemen:

As you are aware, a request for additional funding was submitted to you by Reference (a), approximately one month prior to delivery of the equipment. However, that request for additional funding, which was subsequently approved, was not sufficient to cover added costs incurred in solving two technical problems which developed following that submittal. The two problem areas are discussed below:

1. Paint Matching - Matching the existing painted crinkle finish of the [redacted] Enlarger proved difficult. Even though the paint was obtained directly from [redacted] some parts were painted and baked two and three times in order to obtain an adequate paint match.
2. Light Baffling Mechanism - During the assembly and test phase of the VG-1, the designed light baffling mechanism proved to be somewhat inadequate. The baffling permitted some light leakage which could result in film damage. To overcome these problems five new parts were designed, fabricated, and assembled.
